

**PASVE® pH** is a mounting/service valve for pH sensors. It can be used with practically all pH sensors in this size category in the most demanding measurement locations.

**PASVE® pH** allows the cleaning and calibration of pH sensors without stopping the process. When required, this can be done automatically. To protect the sensor in abrasive processes, it can be turned to the measuring position only for the duration of the actual measurement.

**PASVE® pH** is available in a manually operated type or equipped with a pneumatic or electric actuator.

### TECHNICAL SPECIFICATIONS

#### Compatible pH sensors

Refer to the Selection Table.

#### Max. operating pressure/temperature

40 bar, 250 °C, (see the below table).  
Min. operating temp. -50°C.  
Sensor-specific limitations should be taken into account by the application.

#### Materials

Wetted parts: AISI316L, AISI904L, Titanium, Hastelloy® C276, Duplex, 254 SMO® and PVDF.

Seals: PTFE, PTFE with carbon and graphite filling or PTFE 50%+AISI316 50% mixture

#### Weight

PASVE pHC 4.7 kg, PASVE pHF 4.8 kg,  
PASVE pHF 8.9 kg,  
Actuator 5.5 kg

### OPERATING POSITIONS

#### Measuring position

Sensor in measurement position.  
(Flushing channel can be used for watercooling the sensor and valve)

#### Service and calibration position

Sensor is turned inside the valve for cleaning, calibrating or sensor change without stopping the process.

Pasve pH manual operation

Pasve pH automatic operation with actuator

Sensor cleaning can be automated to prolong the sensor life. Pneumatic and electrical actuators are available for wide application range.

Specification example: PASVE pH D U2 0 O2 X AD3 1 E Z1 IEMC1

**PASVE®** is a ball-type mounting & service valve for SATRON VG and HG type level and pressure transmitters. **PASVE®** makes it simple to disconnect the transmitter from the process for maintenance and cleaning, without stopping the process or draining the tank.

**PASVE®** is available in a manually operated type or equipped with a pneumatic actuator.

### TECHNICAL SPECIFICATIONS

#### Transmitter connection

G1 female, seat accepts SATRON VG-transmitters.

#### Max. operating pressure/temperature

Pressure 40 bar, temperature 250 °C, (see the appended table).

Min. operating temp. -50 °C.

PVDF: See the appended table.

#### Materials

Wetted parts: AISI316L, AISI904L, Duplex, Hastelloy C276, Titanium, for **F** type also PVDF. Seals PTFE or PTFE with carbon and graphite filling.

#### Weight

PASVE GC 4.3 kg, PASVE GP 4.2 kg,

PASVE GF 8.4 kg, Actuator 5.5 kg
